REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1-19 are allowable because the prior art fails to disclose or make obvious, either singly or in combination, a method for automatically determining whether a photosensor in an apparatus is operational comprising, in addition to the other recited features of the claim, "conveying a request signal to the control module for causing the control module to provide the data signal", measuring the output voltage of the light detector based on the data signal, when the applied current is set to one of the first and second current values, for obtaining a measured voltage value, and determining whether the measured voltage value falls in the corresponding predetermined voltage range, thereby indicating that the photosensor is operational".

Claims 20-32 are allowable because the prior art fails to disclose or make obvious, either singly or in combination, a photosensor troubleshooting system comprising, in addition to the other recited features of the claim, "means, operatively connected to the control module, for conveying a request signal to the control module in order to cause the control module to provide the data signal when the applied current is set to one of the first and second current values, means, response to the data signal, for obtaining the output voltage of the light detector based on the data signal so as to

determine whether the obtained voltage value falls in the corresponding predetermined voltage range".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
